

After the so-called coup attempt of July 2016 in Turkey, there has been a tremendous rise of human rights violations. Currently there are thousands of mothers in jails along with hundreds of children as prisoners of conscience whose access to health care is not allowed in jails. Women are being imprisoned when pregnant, deliver their babies as handcuffed and are taken back to jail against all the international law and norms.

Pictured here is Fadime Gunay, a 32-year-old woman who was detained just a day after she gave birth to a baby boy in Turkey's Antalya province on Jan 29, 2017.
